

LC-IPA60

TUBES INTEGRATED AMPLIFIER - POWER AMP

LISTEN & CO.

*Modularity of the dimensions,
the sinuosity of the frontal,
enriched by large luminous vu meters,
the quality of the aluminum details,
make the LC-IPA60 an appreciable object
because the sound quality but also
because charm of its exclusive design.*

THE SOUND

LC IPA60 is an integrated tube amplifier with power amplifier functionality. It works with KT88 and 6550 valves which foresees its use both in triode and ultra-linear mode.

It can also be used as a **standalone power amp**. The 3 transformers are made of silicon steel sheets and high-strength OFC enamelled wire imported from Japan. In the pre section there are ECC82 / 12AU7 and ECC83 / 12AX7 tubes. Clean and detailed sound with an excellent holographic rendering of the music scene.

A “musical instrument” for those who are not satisfied with just listening to their playlists.

OF YOUR

SOUL

LC-IPA60 TUBE INTEGRATED AMPLIFIER - POWER AMPLIFIER

Tubes Integrated Amplifier Power Amp on A/B class

Output connectors: 2 + 2

Power output: 30W RMS on 8 Ohms channels driven Triode (TR) connection
55W RMS on 8 Ohms channels driven Ultralinear (UL) connection

Inputs: 4 lines RCA (CD, TU, A1, PRE)

Input stage: 12AU7 /ECC82 (x2) and 12AX7 /ECC83 (x2)

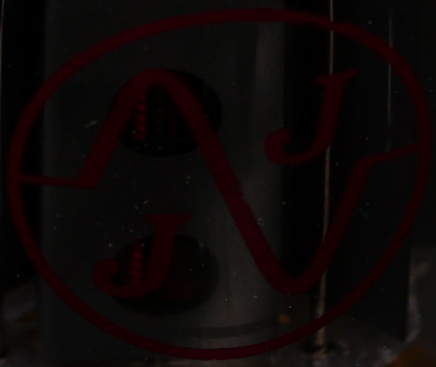

Frequency response: -2dB @ 10Hz / -2dB @ 50kHz

Input sensibility: 360mV RMS

SNR: ≥91dB

THD: < 0,8% @ 1kHz, 10W

Power consumption: ≤410W

KT 88

0.55V
